- Web Technologies :HTML, CSS, JavaScript, React, PHP
- Tools and Frameworks : Spring Framework
- Database Management : MySQL , MongoDB
- Other Skills : Verision Control (Git/GitHub) , Problem Solving & Logical Thinking , Team Collaboration , Productivity Enhancement

PROJECTS

Bookshop Management System
Developed a web-based Edu Bookshop Management System to streamline bookstore operations and enhance customer experience. The project digitizes internal processes for staff and administrators, leveraging modern technologies to improve efficiency, customer satisfaction, and market reach.

Aura Fashion Clothing System
An e-commerce platform for Aura Fashion, transitioning from a physical store to a digital hub with real-time inventory, automated invoices, CRM integration, and personalized recommendations for enhanced customer engagement.

Footwear Management System
A system for DD shoe company, evaluating Monolithic vs. Service-Oriented Architecture (SOA) to balance simplicity, scalability, and integration with vendors, aligning with DD's expansion goals in Sri Lanka.

Savoy Cinema Online Booking System
A modern web platform for Savoy Cinema in Colombo, featuring state-of-the-art facilities like digital projection and 3D movies. It hosts film festivals and premieres, blending historical charm with cutting-edge technology for a vibrant cultural experience.

Bakery Shop App
The "Sprinkles Bakery" mobile application focuses on selecting optimal mobile operating systems, development tools, and technologies to support admin and member levels, ensuring a robust and user-friendly platform for bakery operations.

Design a Database Management System for ABC Car Rentals
Designed a comprehensive Database Management System for ABC Car Rentals in Colombo to streamline car rental operations. The system tracks car details, classifications, rental periods, odometer readings, customer information, pricing, deposits, and billing based on rental duration and additional kilometers, aiming to improve efficiency, accuracy, and customer service.

STRENGTHS

- Strong analytical and problem-solving skills
- Excellent communication and teamwork abilities
- Adaptability to new technologies and environments
- Time management and organizational skills
- Attention to detail and commitment to quality
